

Assignment #1 - UML Class Diagram - Adam Gallant T00632271				
Shape				Driver
attribute: Name				method: main
/		\		
cube	sphere	cylinder		
attribute: width	attribute: radius	radius		
method: constructor	method: constructor	length		
method: toString()	method: toString()	method: constructor		
method: setWidth(double)	method: setRadius(double)	method: toString()		
method: getWidth(double)	method: getRadius(double)	method: setRadius(double)		
method: calculateSurfaceArea()	method: calculateSurfaceArea()	method: getRadius(double)		
method: calculateVolume()	method: calculateVolume()	method: setLength(double)		
		method: getLength(double)		
		method: calculateSurfaceArea()		
		method: calculateVolume()
